Access Control

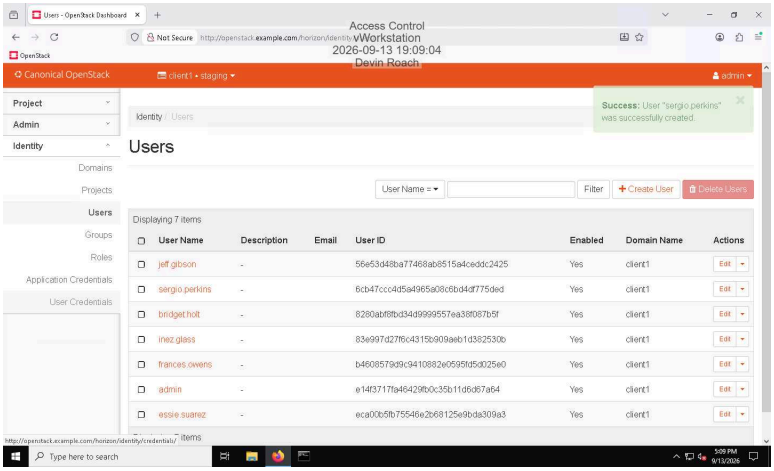

Fundamentals of Cloud Security, First Edition - Lab 03

Student: Devin Roach
Email: devin.roach@siu.edu
Time on Task: 1 hour, 1 minute
Progress: 100%
Report Generated: Sunday, September 13, 2026 at 9:05 PM

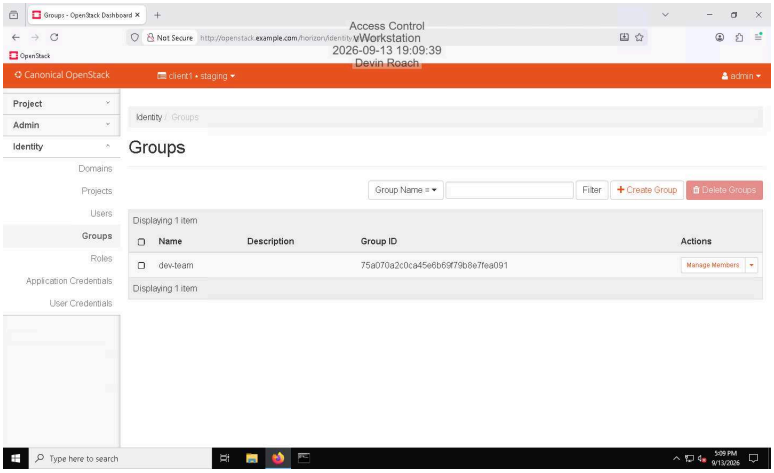

Section 1: Hands-On Demonstration

Part 1: Create Users and Groups with the Dashboard

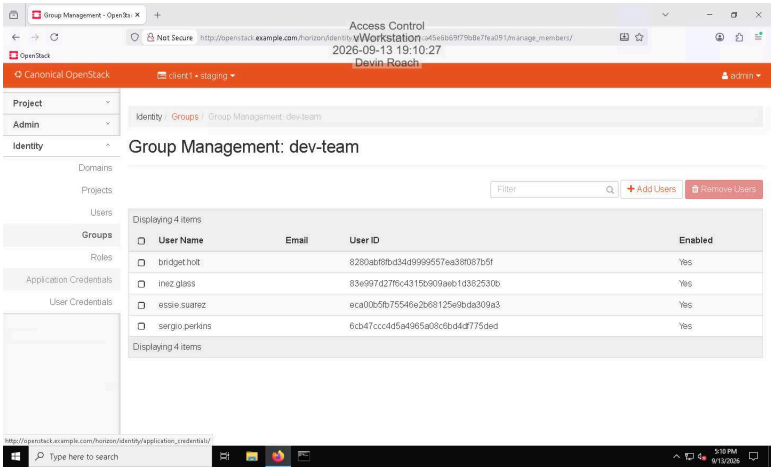

10. **Make a screen capture** of the **Users list showing the newly created sergio.perkins user**.

15. **Make a screen capture** of the **Groups list showing the newly created dev-team group**.

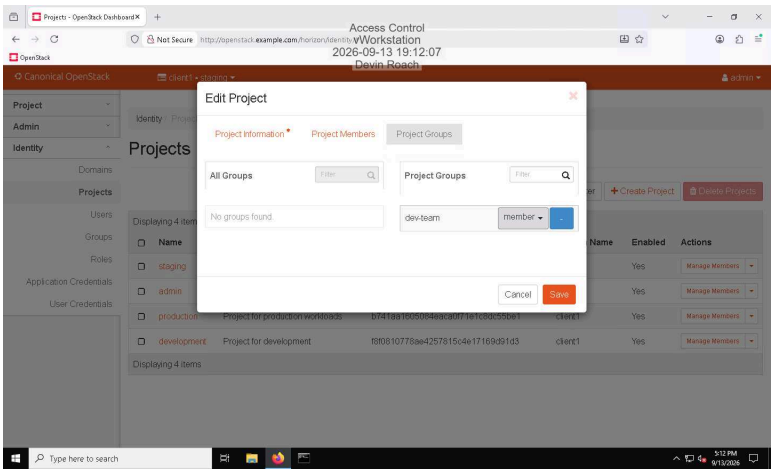

20. **Make a screen capture** of the **Group Management: dev-team page showing all four members assigned**.

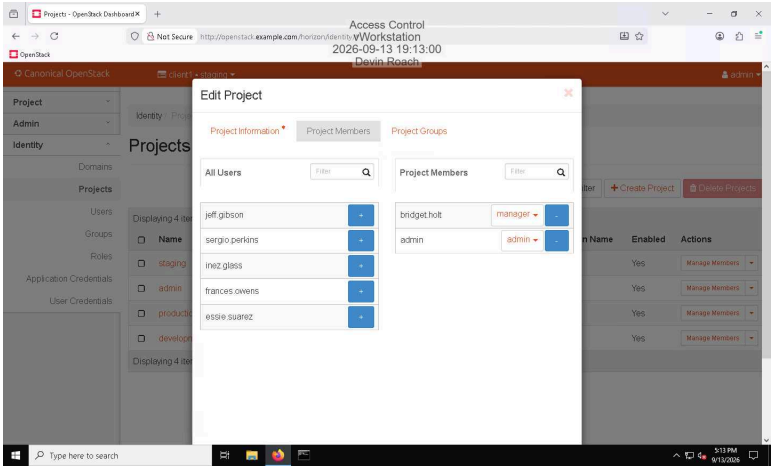

Part 2: Managing Roles

6. **Make a screen capture** of the **Project Groups tab for the production project showing dev-team assigned the member role**.

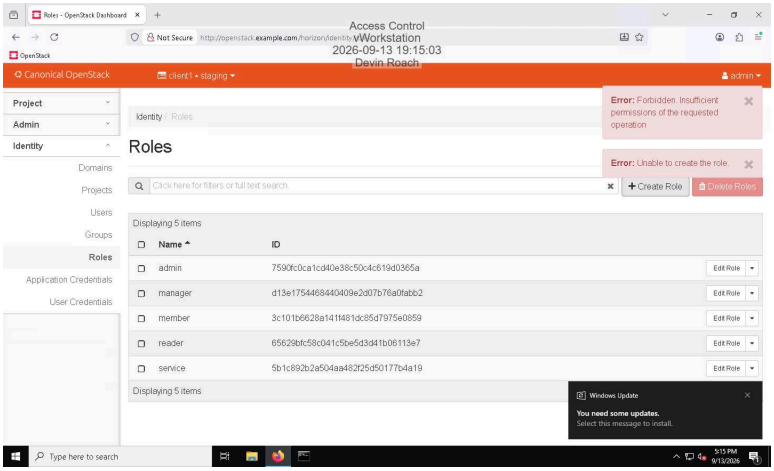

10. **Make a screen capture** of the **Project Members tab for the production project showing bridget.holt assigned the manager role**.

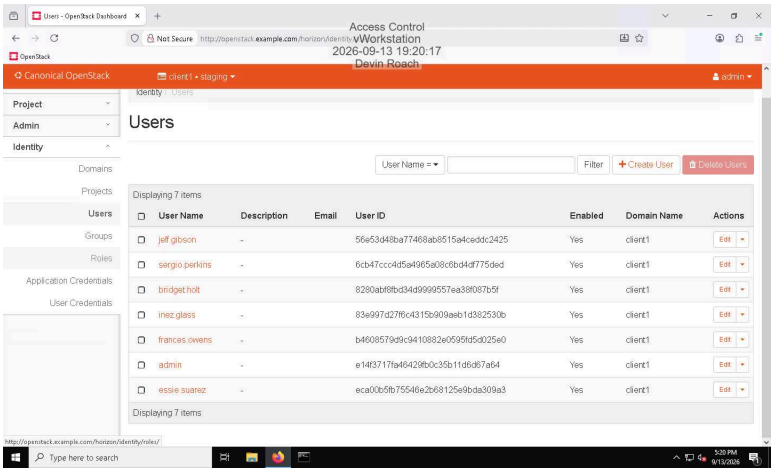

Part 3: Creating a Custom Role

4. **Make a screen capture** showing both **the permissions error from trying to create a new role.**

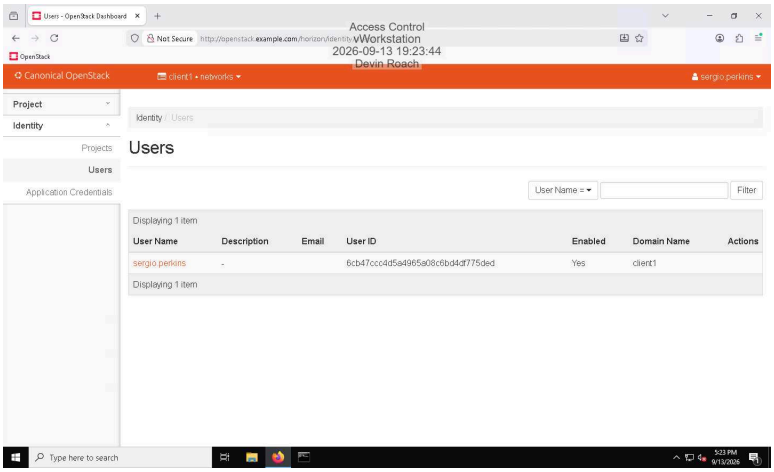

Part 4: Check Access Control

2. **Make a screen capture** showing **that the admin user can see multiple users in the client1 domain**.

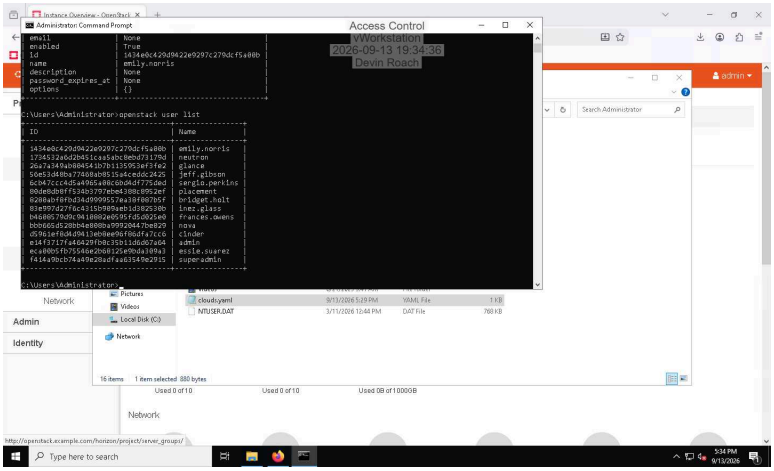

6. **Make a screen capture** showing that **sergio.perkins can only see one user in the list**.

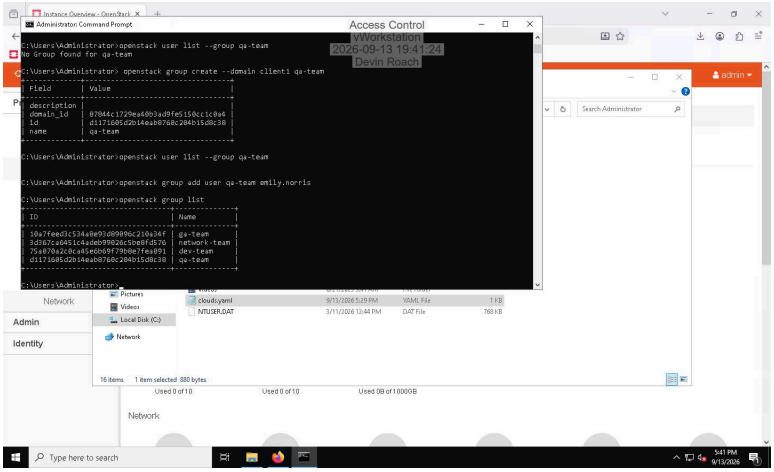

Section 2: Applied Learning

Part 1: Create Users and Groups with the CLI

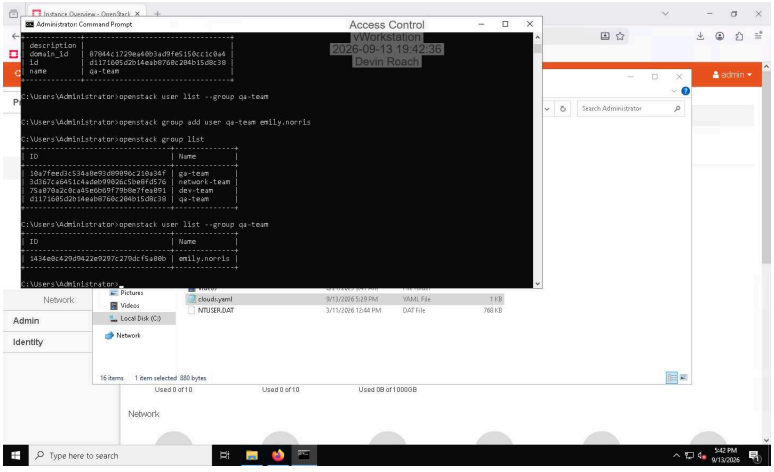

11. **Make a screen capture** of the **CLI output showing the emily.norris user in the list**.

15. **Make a screen capture** of the **CLI output showing the qa-team group in the list**.

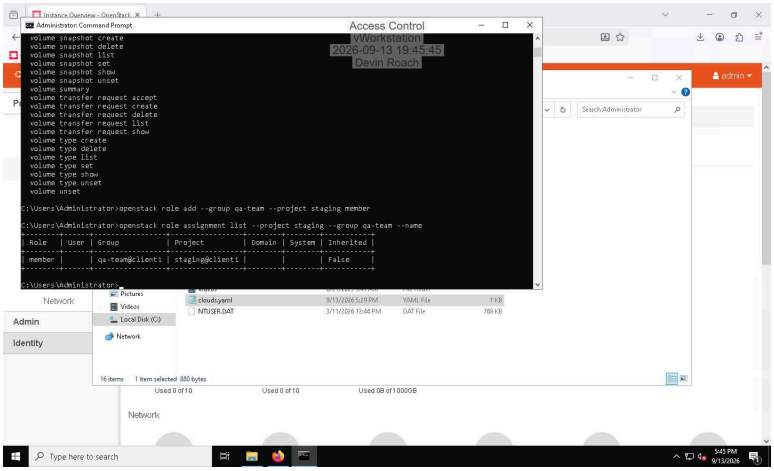

18. **Make a screen capture** of the **CLI output showing emily.norris in the group qa-team**.

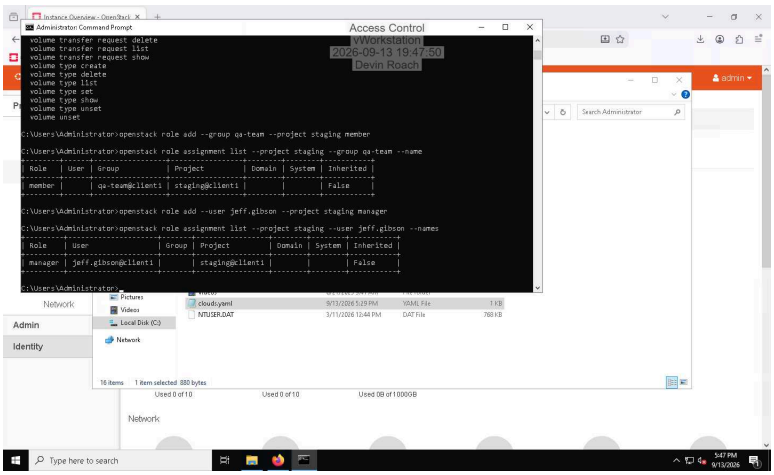

Part 2: Assign Roles using the CLI

3. **Make a screen capture** of the **CLI output showing the member role assigned to the qa-team group for the staging project**.

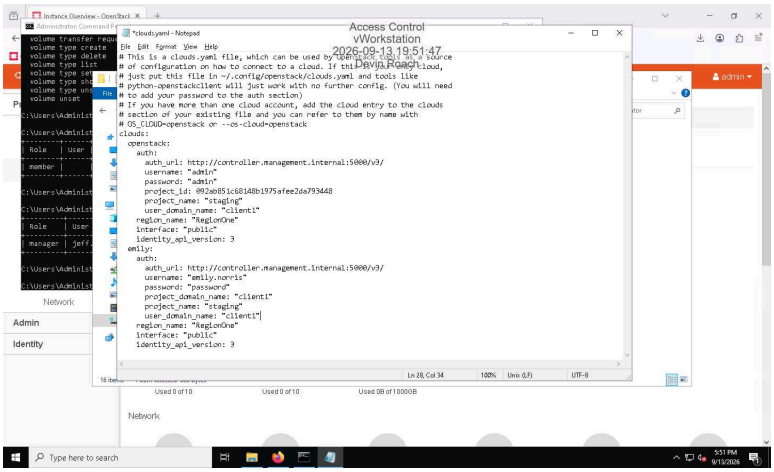

6. **Make a screen capture** of the **CLI output showing the manager role assigned to the jeff.gibson user for the staging project**.

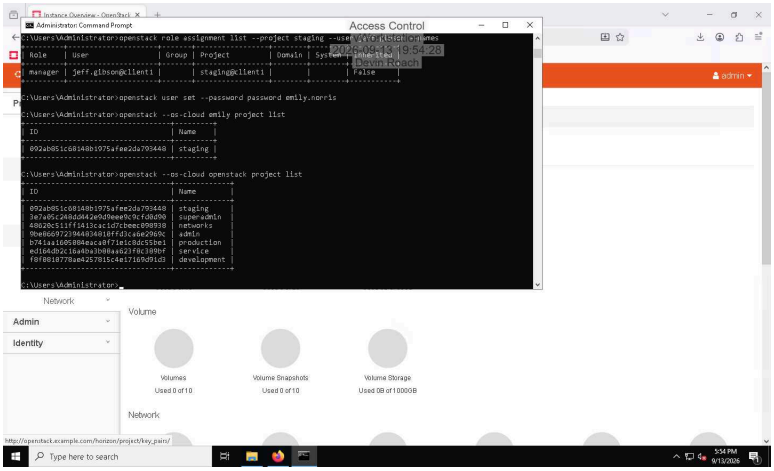

Part 3: Check Access Control for the CLI

4. **Make a screen capture** of the **updated clouds.yaml file showing the configuration for the emily.norris user**.

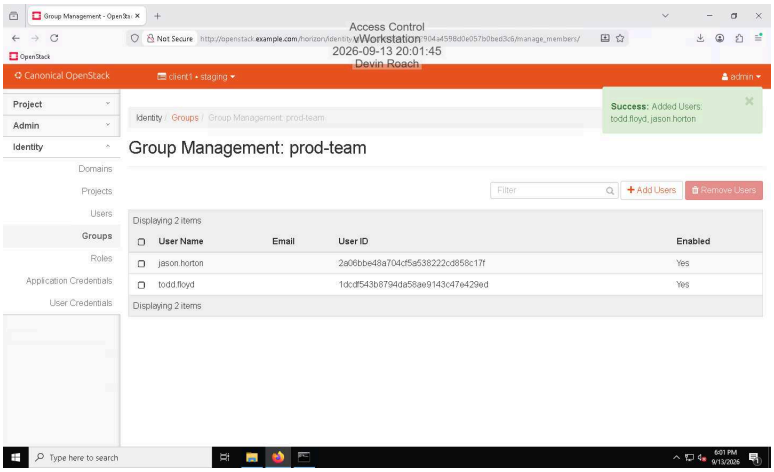

8. **Make a screen capture** of the **CLI output showing the different project lists for the two users**.

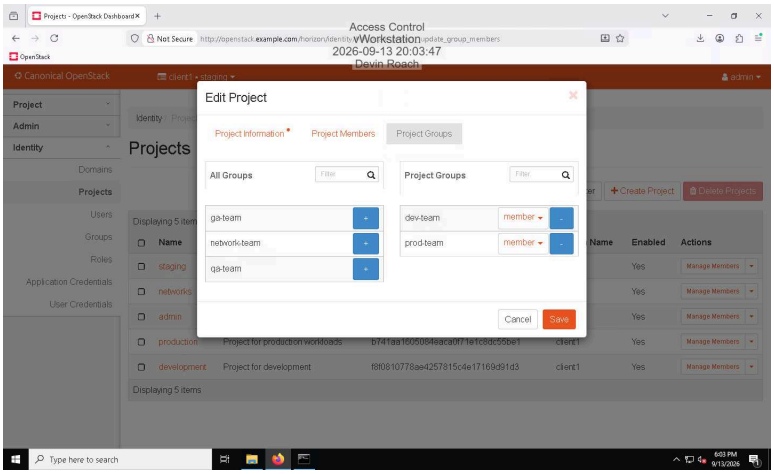

Section 3: Challenge and Analysis

Part 1: Set Up Users and Groups for Production

4. **Make a screen capture** showing the **members of the prod-team group**.

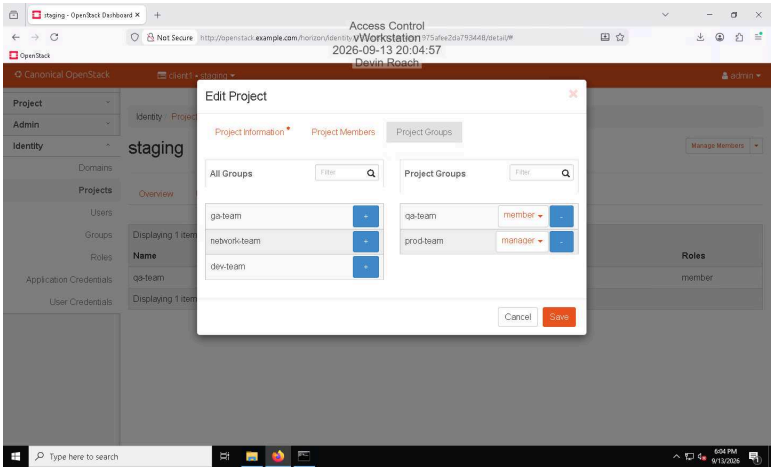

6. **Make a screen capture** showing the **prod-team group's role assignment in the production project**.

Part 2: Add Access to Staging

2. **Make a screen capture** showing the **prod-team group's role assignment in the staging project.**
